BIOGRAPHY

Carli B is a Registered Nurse turned recording artist, motivational speaker, and women's liberator. She spent two decades architecting a life built to prove her worth, until she finally asked for the truth at forty-one and everything changed. What followed was an eight-song EP spanning grief, rage, tenderness, and joy: not a dance party, a restoration. Louisiana-raised and Houston-based, she's booked for conferences, leadership retreats, and women's gatherings worldwide.
